GREY LADY MARINE

Spring Repair Request Form & Work Order Authorization

Boat / Customer Name: _____

Unless otherwise instructed in writing, GLM will perform standard Spring Commissioning maintenance on your boat.

Standard spring commissioning includes general engine lubrication and tune-up, prepping and repainting bottom and lower unit, cleaning, detailing, general inspection, replace anodes as necessary, buff/compound/wax, bleed and flush steering system, charge and connect batteries, change fuel and oil filters, replace spark plugs as needed, clean VST tanks, remove and dispose of fouled fuel, check belts, check and replace thermostats as needed, check and replace water pumps as needed, check and repair electrical systems as needed, check and replace fittings as needed (e.g. hinges, cleats, etc), update safety gear as required by USCG and test run before delivery.

Even if you have had a verbal conversation, we require following up in writing. If you prefer us to not perform certain tasks please submit a written request outlining the service items you wish to delete. If you would like us to perform any additional (or any less) work or check specific items on your boat, please make a note here:
